ADELEKE ENIITAN YETUNDE

Software Developer | Frontend Engineer | React / JavaScript

Ibadan, Oyo, Nigeria | +234 902 746 3862 | eniitanyetunde@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Software Developer and Frontend Engineer with hands-on experience building, testing, debugging, and maintaining responsive web applications using JavaScript, React, Next.js, HTML5, CSS3, and Tailwind CSS. Experienced in REST API integration, authentication and role-based routing, state management, reusable component development, Git/GitHub collaboration, QA testing, and AI-assisted software development with GitHub Copilot and Claude. Comfortable navigating existing codebases, translating requirements into working features, documenting issues, reviewing application behavior, and collaborating asynchronously with technical teams. Strong written communication, attention to detail, and a practical focus on clean, maintainable, production-ready software.

TECHNICAL SKILLS

Programming & Web: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, React Router, Context API

Software Engineering: Responsive Web Development, Component-Based Architecture, REST API Integration, Authentication, Role-Based Routing, State Management, Debugging, Codebase Navigation, Cross-Browser Compatibility

Testing & Quality: Manual QA, End-to-End Testing, Test Case Documentation, Bug Reporting, Regression Checks, UI Validation

Developer Tools: Git, GitHub, GitHub Copilot, Claude, Vercel

Ways of Working: Agile Collaboration, Code Reviews, Technical Documentation, Asynchronous Communication, Requirements Analysis

PROFESSIONAL EXPERIENCE

Frontend Developer | Tiva Creative

- Build, refactor, test, and maintain responsive web applications using React, Next.js, JavaScript, HTML5, CSS3, and Tailwind CSS, with emphasis on maintainable components and consistent behavior across screen sizes.
- Translate client and product requirements into functional web features, reusable UI components, navigation flows, forms, search/filter experiences, and customer-facing application pages.
- Integrate frontend applications with APIs and application workflows, troubleshoot defects, review browser behavior, and resolve usability or responsiveness issues before release.
- Conduct end-to-end QA, write and execute test cases, reproduce defects, document bugs clearly, and verify fixes to improve release quality and reduce avoidable regressions.
- Use Git and GitHub for version control, branching, code collaboration, change tracking, and delivery across multiple concurrent web projects.
- Use GitHub Copilot and Claude as AI-assisted development tools for code generation support, debugging, refactoring, and productivity while validating outputs against project requirements.
- Participate in team standups, delivery reviews, progress reporting, and cross-functional discussions, communicating technical progress and blockers clearly in an asynchronous work environment.

Frontend Developer | Lufemos Consults | *2021 - 2023*

- Developed and maintained React-based interfaces and dynamic web pages for client projects, converting requirements into usable, responsive application experiences.
- Built responsive layouts and interactive features with JavaScript, HTML5, CSS3, Tailwind CSS, and React, ensuring consistent functionality across desktop and mobile devices.
- Collaborated with team members through Git and GitHub for version control, code review, issue tracking, and coordinated delivery of application updates.
- Performed manual testing, debugging, accessibility-minded UI checks, and cross-browser validation to identify and resolve defects before deployment.

SELECTED SOFTWARE PROJECTS

Eduspline | React-based Student Performance Monitoring Platform

- Contributed the full frontend of a team-built application for educational institutions, covering landing pages, authentication, email verification, role-based routing, admin workflows, and personalized student dashboards.

- Implemented dashboard data visualisation, CSV upload flows, dropout-risk indicators, and engagement metrics using React.js, JavaScript, CSS3, React Router, and Context API, integrated with a live REST backend.

THF Cocoa | React / Next.js Web Application

- Built a responsive production website for a cocoa production and distribution company, structuring reusable content sections and user flows for products, sustainability, production information, and customer enquiries. Live: https://thf-cocoa.vercel.app/

The Appointment | Healthcare Appointment Website

- Developed a user-friendly healthcare service interface supporting service discovery, appointment booking, available time-slot views, and scheduled-visit management. Live: https://theappointment.org/

All Hour | React / Next.js Commerce Experience

- Built and refined responsive commerce-oriented interfaces with product browsing, search/filter patterns, reviews, and purchase-flow presentation, focusing on clear UI structure and mobile usability. Live: https://allhour.vercel.app/

Recommender | React Application

- Developed a personalized recommendation interface driven by user-selected genre, mood, and experience level, demonstrating dynamic state management and API-oriented frontend logic.

Job Filtering Page | JavaScript Application

- Built a dynamic job-listing interface that supports search and criteria-based filtering to help users quickly narrow opportunities.

EDUCATION

Certificate in Software Development (Frontend) | Tech4Dev - Women Techsters Fellowship | *In Progress*
Intensive software development training covering React, JavaScript, modern frontend engineering practices, collaborative development, Git, and GitHub.

B.Sc. Sociology | University of Ilorin | *Dec 2015 - Sept 2019*

CERTIFICATIONS

- JavaScript Algorithms and Data Structures - freeCodeCamp
- Responsive Web Design - freeCodeCamp
- Software Development (Frontend) - Axia Africa

ADDITIONAL STRENGTHS

Problem Solving | Written Communication | Attention to Detail | Adaptability | Time Management | Team Collaboration | Continuous Learning
